**Importance:** Normal

---

Ken,

I'm preparing to move to a new notebook with HBS fixed IP 199.94.11.147. Can you add an appropriate exception to the firewall?

Remote address: 65.96.166.17

Local address: 199.94.11.147

Local port: 3389

Incidentally, this setup continues to work great for me -- letting me get 1200x1200 pixel Remote Desktop connections, letting me open multiple connections in a single step, etc. Thanks very much for making it work.

Ben Edelman

Subject: RE: Edelman home IP

Ken,

This week my home IP changed to 65.96.166.17. Can you remove the old .192 firewall exception and add a new exception for the new address?

Remote address: 65.96.166.17

Local addresses: 199.94.11.105 and 199.94.11.108

Local port: 3389

Thanks,

Ben

Hi Ben,

This should be all set.

Thanks,

Hi Ben,

Sure thing. I'll let you know when it is all set.

Thanks,

--Ken

Subject: Edelman home IP

Ken,

Following up on our meeting of yesterday --

My home IP is 65.96.161.192. That has only changed a few times in the past few years, so I'm hopeful that I won't have to send you frequent updates.

I'd like to be able to access Remote Desktop, port 3389, on both my HBS systems. They have fixed IP's 199.94.11.105 and 199.94.11.108, respectively.

Thanks,

Ben
